Euro4Science 2.0

Presentation

Euro4Science 2.0 is a spin-off of the Euro4Science project. We use the CSI motto through crime cases to create challenges that students can solve using techniques such as blood type analysis while learning mathematics, chemistry and other STEM-based subjects in active and exciting way. Euro4Science 2.0 will expand and improve the Forensic Science Education Toolbox with materials and activities for teachers and students including activities related to environment, health and citizenship.

The Forensics Science Education Toolbox consists of a box with materials for experiments (activities), supported by a Teachers' Guide and a Students' Guide. It is available in 6 languages (EN, PT, BG, PL, GR and TK) and it was designed to be used by students in class under teachers' supervision. Hundreds of units of the Toolbox will be produced and distributed by schools all over Europe.

If you are a teacher and you or your school are interested in getting the Toolbox and receive training on how use it, please contact us. Learn more about the toolbox ([here](#)).

EURO4SCIENCE 2.0

The main activities of Euro4science 2.0 include:

- Improvement of the Forensics Science Education Toolbox by adding new activities and a video library with live demonstrations on how to solve the activities proposed;
- Training hundreds of teachers in Portugal, Poland, Bulgaria, Greece, Turkey and in the UK, so that they can use the Toolbox and train further teachers for this purpose;
- Create a European Network for Forensic Sciences in Education, with "Hotspots" prepared to train teachers for the use of the Toolbox;
- Organise Forensic Science Festivals in various countries, as well as an International Symposium of Forensic Education.

The main outputs produced are:

- Forensic Science Educational Toolbox**
- Video Library and YouTube channel**
- Forensic Science Educational Book**
- European Network of Forensic Sciences in Education**

A European Network of Forensic Sciences in Education will connect all schools and teachers using the Forensic Sciences Toolbox.

- Teachers training and "Regional Hubs"
- From Hub to Hotspot
- The Platform for Network
